

PRESS RELEASE

Cape Canaveral is a leading municipality to use a new software program from the Florida League of Cities called “A Better Place” civic tracker. From the City’s web site anyone can input and track the status of an item that needs attention by a City Department.

City Manager Bennett Boucher relates the software’s ability to route complaints directly to the department and to initiate work orders while online. A Better Place will also be used when residents visit City Hall with a concern. “This will enable our City to respond quickly and efficiently to the needs of the community.”
